

ATC Healthcare Services, Inc. a pioneer in healthcare staffing for the past 30 years was ranked amongst the Largest US Healthcare Staffing Firms for 2014 by Staffing Industry Analyst for the second consecutive year. Staffing Industry Analysts, the global advisor on contingent work, was founded in 1989 and is owned by Crain Communications. This independent entity is known for its objective insights, proprietary research, support tools, publications, and executive conferences that provide a competitive edge to decision makers who supply and buy temporary staffing.

ATC Healthcare Services, Inc. is a provider of nursing and allied healthcare professionals that places clinical staff wherever healthcare is provided. It is a national network of over 40 locally owned and operated offices that provide comprehensive staffing offerings including contingent staff, contract labor, travel staffing, temp to perm placements and direct hire services. This unique model enables ATC to offer local market and community support combined with national resources of a formidable industry leader.

ATC's CEO David Savitsky said not only is he proud of the acknowledgement and accomplishment of being named one of the largest US Healthcare Staffing Firms, but also because ATC was ranked both as an overall provider of medical staffing and as a per diem nurse staffing provider. We have been able to accomplish this for the past several years because we have a dynamic team of franchise owners, a dedicated and talented staff of Healthcare Associates and a network of staffing partners in our clients. Our goal is to be an employer of choice to our clinical personnel and a provider of choice to our clients. By remaining steadfast to these valuable principals we have been able to realize steady growth.
